

Fabricated Steel Mounting Brackets & Stakes

Lyall offers a complete line of standard and custom brackets and stakes for all of your riser and meter set requirements, both residential through rotary applications. All brackets and stakes are fabricated, welded, coated and packaged to utility specifications under the tightest production and quality guidelines.

Product Benefits

- Designed to lower your field installation costs by reducing labor materials for field pipe cutting, welding and painting.
- Helps in positioning the service during installation as well as secure and protect the service once installed.
- Our polyester based powder coatings offer superior weather and UV resistance, high mechanical properties and a very smooth finish with excellent coverage. This is an exceptional coating for above-ground applications for aesthetic, atmospheric and corrosion-resistant benefits.

For pricing or technical information, please contact your Lyall sales representative or customer service.
